

Useful Information and Inscription :

Professional Course

Our school offers a two-year course exploring movement as well as the relation between life and art in order to develop a creative theater. The school is intended for those who have finished their drama studies, have a preliminary experience on stage and wish to gain more insight into their abilities as actors, directors and playwrights.

The journey in our school begins with a probationary term after which the teachers and the students decide to continue or not. The first year is a program in itself to stimulate curiosity and interest in the phenomena of everyday life and to provide basic acting skills. The teaching and directing staff decide on the selection into the 2nd year according to criteria of acting and involvement in the 1st year.

After two years a certificate is delivered confirming that the course has been completed. The school is a recognized and approved as a training institute by the French Ministry of Labour and Employment under the number 1194 137 0775

The season starts in October and finishes in June. There is a two-week vacation, at Christmas and in March. Classes are held Monday through Friday, four hours a day in our premises and ten more hours are needed for personal work. The courses are taught in French which means that a basic knowledge is required since no time is allowed for translation.

You can enrol all year long for the coming season. To consider your application we must receive (by post or email) your curriculum vitae (giving your date of birth, contact details and precise details of your artistic experience), a portrait and a photo from top to toe, both recent, a letter of recommendation from a former teacher or director and your personal motivation. There is no audition, the selection is made by written application.

Laboratory of Movement Study : LEM (optional course)

The LEM is intended for those interested in exploring the relationship between scenography and theatre. Some artistic experience (sculpture, painting, dance, architecture, scenography...) is useful. The classes are held from October till June, Tuesday through Thursday in the evening. This laboratory is an autonomous course that can easily be included in the professional course.

Should you be interested in our courses and wish to receive our tariffs and further information please go to the Contact page of the site where you will find an email link to reach us.
